

03WTE WIRE WRAP TOOL

- Provides a modified wrap for 30 gauge kynar wire
- Strips, wraps and unwrap wire

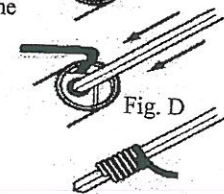

Instructions For Stripping Insulation:

1. Press the wire to be stripped into the wire stripper's slot, about 1" from the end. (Fig. A) Pull the wire down into the slot.
2. Push the wire stripper with the blade away from you to strip the insulation

Wrapping Wire:

1. Insert the stripped end of the wire into the tool's half moon-shaped hole on the edge of the tool and out through the groove in the tool. Insert until insulation bottoms out. (Fig.B)
2. Bend the wire over the tool and hold. (Fig.C)
3. Place the tool over the terminal or post and turn clockwise about 10 turns, to wrap the wire around the post. (Fig.D)

Unwrapping Wire:

1. To unwrap, place shortend of tool over post so wrapped wire seats in the end of the tool.
2. Turn tool counter-clockwise.
